

# Install Client Access Service Pack

## INSTALL SERVICE PACK PROCESS FROM THE INTERNET

- Go to <http://www-1.ibm.com/servers/eserver/series/access/sphist.htm>
- Scroll down and choose the correct Service Pack for the As/400's Version Release
- Click on the Most Recent (bottom of the list) "SFxxxxx" link
  - Note:* Use the "SIxxxxx" if your version of Client Access is **v5r1m0** or greater
- Right Click on the "SFxxxxx" and choose "Copy to Folder"
- Pick a place on your "C:" drive to save this file (Preferably C:\service\_packs)
- Once the download completes, find the downloaded "SFxxxxx" file and double click it.
- It will uncompress into the same folder that you copied the "SFxxxxx" file into
- Then find the **SETUP.exe** program in that same folder and double click it
- Choose all of the defaults except View ReadMe.
- After loading the Client Access SERVICE PACK and **rebooting** click Start/Settings/Control Panel/Client Access Properties. Click the Service Tab and change "WHEN TO CHECK" to NEVER.

## INSTALL EXPRESS SERVICE PACK PROCESS

- Place Service Pack CD in CD Drive
- Click Start/Run and Browse. Then find the **SETUP.exe** program on the CD-ROM drive. If there is a **Service\_Pack** folder then chose the **SETUP.EXE** in that folder.
- Click OK
- Choose all of the defaults except View ReadMe.
- After loading the Client Access SERVICE PACK and **rebooting** click Start/Settings/Control Panel/Client Access Properties. Click the Service Tab and change "WHEN TO CHECK" to NEVER.

## INSTALL WIN95/NT SERVICE PACK PROCESS

- Place Service Pack CD in CD Drive
- Click Start/Run and Browse. Then find the **SETUP.exe** program on the CD-ROM drive. If there is a **Service\_Pack** folder then chose the **SETUP.EXE** in that folder.
- Click OK
- Choose all of the defaults except View Readme.
- After loading the Client Access SERVICE PACK and **rebooting** click Start/Settings/Control Panel/Client Access Properties. Click the Service Tab and change "WHEN TO CHECK" to NEVER.
