

Configure Client Access Workstation - Internet

1. First retrieve your TCP/IP Address and enter them here:

iSeries TCP/IP Address: _____ . _____ . _____ . _____ (Get from Network Administrator)

2. Place Client Access CD in CD Drive (Install process)

- Choose "Install iSeries Express" and take all of the defaults.
- If you get the message "The software has not passed Windows Logo testing..." – click "Continue Anyway"
- After loading Client Access and **rebooting** click Start/Programs/IBM Client Access/Client Access Properties. Click the Service Tab and change "WHEN TO CHECK" to NEVER. Click OK

3. Install the Latest Service Pack

- SWL CD only - Click **Start/Run** and browse to the cd drive \Service Pack\Setup.exe or
- <http://www-1.ibm.com/servers/eserver/series/access/casp.htm>
- After loading the Service Pack you will need to reboot.

4. Make sure you are connected to the Internet.

Click Start/Programs/IBM Client Access Express/Emulator/Start or Configure a Session

- Click on the Configure box for configuring a New Session profile.
- When it asks for the System Name type in the iSeries TCP/IP Address listed above.
- Type in a unique Workstation ID. (A commonly used convention is the user id, followed by underscore and the letter "A", for the first workstation session then "B" for the second, etc. (i.e. JOE_A)
- After clicking OK you should get one, possibly two sign-on screen(s). Enter your iSeries user id and password. If applicable check "Save Password".
- Click *File* pull down. Then click on *Printer Setup*. Select or click on a printer and click OK
- Next click on *Edit/Preferences/Appearance/Window Setup*. Under the "Window Title" heading uncheck everything except **Session Name**
- Then enter the workstation Id you used previously in the FileName box. (i.e. JOE_A) and click OK
- Click *File* pull down. Then click on *Save As*. Key the same workstation id into the *File Name* box (i.e. JOE_A) and click OK
- An "Add an Icon Message" Window will Pop up. Click YES.
- Scroll to the top of the list and select *DESKTOP*. Then click OK
- A "You can click on your New Icon Message" Window will Pop up. Click OK

Congratulations!! You have created an iSeries workstation connection with an icon that you can click on to start up you workstation session.
